

# Dialock DFT Furniture Locking System

This example shows you a possible configuration and what the Dialock furniture locking system looks like behind the scenes. All components feature simple 'plug and play' connections.

Dialock DFT can be installed as a Basic Version or as an online Version for larger projects. In the online version, the central locking terminal is located in the main office with a central shut-down option in case of any emergency.

## Dialock The system for a wide range of applications

Dialock – The system includes a wide range of other access control possibilities:

- All electrically operated external doors, sliding or hinged
- Internal doors
- Lifts
- Car-park barriers
- Roller and lifting doors and gates
- many more...

Our staff of expert advisors are there for you. They will help you with planning complex applications and will show you the best possible solution. Please contact your nearest Häfele sales office for more information.

## Dialock DFT Furniture Locking System

2008

# Dialock DFT Furniture Locking System

A sensible combination of mechanical security and outstanding electronic comfort

## The Product

**Dialock DFT** is a touch-free identification and locking system. It replaces the combination of mechanical keys and locks completely and offers a significantly greater range of functions. Dialock is very flexible and can be extended at any time, from one to multiple users. The DFT identification and locking system is made up of five basic components:

- Electronic keys
- Dialock Furniture Terminal – DFT
- Locking Device – FLC for all hinged doors and drawers
- Locking Device – SDL for sliding doors
- 12VAC Power Supply

Conventional keys are replaced by an electronic key. The key contains a memory chip on which user data and access authorisations are stored.

**Dialock DFT** can be used on:

- Drawers
- Cabinet doors
- Glass doors
- Sliding doors
- Display cabinets
- Wall cabinets
- Shutters
- and many more

## The Features

- Simple planning of locking schedules
- Easy to install thanks to plug-in connections – no knowledge of electronics required
- Easy to program
- Easy to use
- No wear and tear – Wireless data transfer from key to antenna
- Forgery-proof through unique coding
- Locks are concealed
- Re-programmable keys - as often as required
- Access authority for multiple users
- If a key is lost, the access authorisation can be withdrawn without having to replace the locks
- Up to 11 locks with one DFT Terminal in the base version
- Different locking functions, i.e. toggle, lock cycle
- If a door is open too long an alarm can be set to remind staff
- If a door is forced open an alarm can be triggered

## How Dialock DFT works

**1.** Hold programmed key close to the reader.

**2.** A signal will be sent to the concealed DFT-terminal, which releases the lock(s) that the key is authorised to open. Then open the drawer, glass sliding door, etc

**3.** ... take out or place object. Closing the drawer or glass display will automatically re-lock it.

**Dialock DFT Furniture Locking System** – Easy and Secure

## Where to install Dialock DFT

The **Dialock DFT** locking system is a secure and convenient way to protect property of any kind. It can be installed in many locations/ applications such as:

- Jewellery Stores
- Optometrists
- Hospitals
- Chemists / Pharmacists
- Doctor and Dental Surgeries
- Offices
- Receptions
- Law Firms
- R & D departments
- and many more

## Application Examples

### 1. Shops

Sophisticated shop-fitting for high-quality jewellery or watch displays, which require uncompromising design solutions with a high degree of functionality and security.

### 2. Offices

Protect your documents from unauthorised access. **Dialock DFT** allows you to open and lock your office furniture doors in an instant. Just one programmed key for all furniture locks.

### 3. Hospitals and Doctor's Surgery

If the doctor has to leave the room for a moment, medicines and records are kept safe in treatment rooms, consulting rooms and receptions. One key for all furniture locks.
