TRONIC MIFARE.

RFID CARD LOCK FOR LOCKERS.

Stand alone RFID lock for lockers with IP65 protection. TRONIC Mifare allows total control of lockers by using the most widely recognised RFID technology. Tronic Mifare is provided with an optional management software and table reader. This complete solution allows facility managers to remotely create / delete tags, limit, control the time of use and read the last events, locker number, battery level, user ID etc. All parameters of the lock can be easily programmed by using the electronic setting card. With up to 5 master cards and 50 user cards per lock, TRONIC Mifare is a complete locker management solution. TRONIC Mifare also has the possibility to integrate into existing access control systems using Mifare.
