

The background image shows a bright, modern kitchen with white cabinetry. A man in a wheelchair is seated at a dark wooden table in the foreground, looking at a newspaper. On the table are a glass of water and a small jar. In the background, there is a built-in oven, a window with a view of the outdoors, and several framed pictures on the wall. A small potted tree is in the corner. The overall tone is clean and professional.

# Assisted Living | BY **HÄFELE**

# Because everyday life is important

## Freedom and confidence to be independent

People with disabilities deserve a better life with more self-esteem, quality and the freedom to safely look after themselves.

Häfele are the world's leading specialists and producers of assistive devices for accessibility as well as equipment for ergo and physiotherapy rehabilitation. Häfele products are recognised and appreciated around the world for their high quality, flexibility and accessibility as well as suitability.

Today - thanks to our experience and key partnerships, we are bringing this unique know-how about accessibility and work environments to New Zealand.

# 360° Project service

## Project services for specifiers

Häfele provides comprehensive project services to specifiers, planners, consultants and specialists in architectural hardware, furniture design and access control.

Services include detailed planning manuals, seminars for planners addressing special topics, tendering texts, application examples and suggestions, CAD files and other planning support such as the Häfele TEC Service for standards and instructions available at [www.hafele.co.nz](http://www.hafele.co.nz).

Specifiers can also make use of our team of experienced sales consultants who can provide a wide range of functional and design options.

# The multifunction kitchen

## ROPOX by Häfele helps to select the best kitchen

We are ready to help and guide you. Together, we can plan a kitchen with optimal space utilisation. Involve us from the moment you plan your house and utilise our 98 years of experience. Together, we match your needs and make sure that the end result is perfect.

Multi-functional kitchens are flexible and offer a wide range of individual solutions for housing, schools, nursing homes, training and institutional kitchens, private homes, in the workplace etc. All height-adjustable systems can be hidden and operated either electronically or manually. Easy to fit, the systems are stable and safe and made only of top quality materials.

# Ideal kitchen layouts

## Straight kitchen

- > Two people can work next to each other.
- > Plenty of space for assistance.

## L-Shaped kitchen

- > Seated and standing users could have independent work stations.
- > Easy wheelchair access.
- > Preparation area allows reach to sink and cooktop for easy movement without moving position.

## Galley kitchen

- > People with mobility impairments can lean on benchtops on two sides.
- > Two independent work places.
- > Sink and cooking section should be installed on same side.
- > May be difficult for wheelchair turning and movement.

## U-Shaped kitchen

- > Objects can be pushed along the entire benchtop.
- > Easy wheelchair access.
- > Greater distances to cover between appliances.

# The benchtop reaches new heights

## ROPOX benchtop systems

Having the benchtop adjusted to the perfect height, makes a big difference for each activity. Different heights are required to knead dough, stir pots, chop vegetables or wash up.

It's a huge advantage to be able to adjust the benchtop height – whether standing or seated, promoting self-sufficiency and optimal working conditions in the kitchen. What's more, our solutions offer seated users more leg space and the freedom to move around with ease.

# Benchtop Systems

Flexi Electric / Flexi Manual / Flexi Corner

- > Flexi Electric is optimal for frequent and independent use.
- > Flexi Manual for less frequent adjustment.
- > Ideal for private homes, schools, training kitchens, nursing homes, workplace etc.
- > All types of kitchen benchtops can be fitted to the frames in lengths from 800 – 3000 mm.
- > Flexi Corner suits single person use and can be any size up to 3000 x 3000 mm.
- > Sinks and cooktops can be integrated in the benchtop.
- > Easy to adjust in height, manually or electronically.
- > Concealment panels can hide the legs and plumbing, or use leg covers for extra access space.
- > For added safety we always recommend safety stops for electric systems to avoid the risk of trapping.
- > Weight capacity is  $\leq 150\text{kg}$  when evenly distributed
- > Bench adjustability height of 300 mm

Two separate benchtops giving two different heights in the kitchen for two people.

ROPOX leg covers and concealment panels hide fittings from view, leaving a clean finish.

# Wall cabinets that come to you

## ROPOX wall cabinets

Our goal is to make it easy to see and reach everything in all wall cabinets – the solution you choose, will depend on ability to reach when either standing or seated. Maybe straight up/down movement which brings everything into reach, or to make things even easier the diagonal brings the whole cabinet to the front of the benchtop, moving over the kettle, toaster or tap and a simple push of a button will adjust the height. All fixings are concealed for a hidden and neat installation which means no unsightly brackets etc.

Safety stop plates beneath the units ensure nothing is trapped between the unit and benchtop. Again, the needs and situation decide what's best. Together, we can find the perfect solution!

# Wall Cabinets

## Verti Inside (Electric vertical height adjustable)

- > Installed inside the fixed cabinet (standard widths between 400 - 1000 mm).
- > An excellent retrofit solution for existing units.
- > Completely concealed fixings.
- > Downward adjustment by 495 mm.
- > Designed for loads of up to 80 kg.
- > Height adjustable shelves.
- > Optional lighting can be integrated in bottom safety stop plate.

## Verti Diagonal (Electric Diagonal height adjustable)

- > Diagonal adjustment - downward 430 mm, forward 180 mm.
- > Completely concealed fixings.
- > Frame depth only 115 mm.
- > Frames available for cabinet widths from 400 - 1200 and 1400 - 1800 mm.
- > Designed for loads up to 120 - 220 kg.
- > Optional lighting can be integrated in bottom safety stop plate.

## Verti Electric (Electric vertical height adjustable)

- > Entire wall cabinet adjustable in height.
- > Downward height adjustment by 300 mm.
- > Completely concealed fixings.
- > Frame depth only 50 mm.
- > Frame available in two models for cabinet widths from 400 - 1200 and 1400 - 1800 mm.
- > Designed for loads of up to 80 and 120 kg.
- > Safety stop plate can be installed on the unit base to avoid the risk of trapping.
- > Optional lighting can be integrated in bottom safety stop plate.

## Brackets for wall cabinets

- > Brackets enable stepped height adjustment of wall cabinets for very occasional adjustment. Cabinets are lifted off and placed at another height.
- > Completely concealed fixings.
- > Height adjustment of cabinets in intervals of 42 mm, technician required.
- > Designed for loads of up to 90 kg.

## Keeping surfaces mobile and adjustable

### ROPOX 4Single frame

- > Ideal for the whole family – adults, children and wheelchair users.
- > Can be used for a multitude of activities in the kitchen, like computer work or art as well as food preparation.
- > Height range of 300 mm (720 - 1020 mm clearance under frame).
- > Adjust the height simply by the push of a button or by using a winding handle or remote control.
- > We make the frame to the size of any kitchen benchtop or dining tabletop - up to 3000 x 1200 mm.
- > Sinks and cooktops can be integrated into worktop.
- > Optional brake castors make it easy to move the table, but standard adjustable feet or hidden floor fixings can be used.
- > A rechargeable battery solution means the electric version is easily mobile.
- > The frame is designed for loads of up to 150 kg (or 250 kg upon request)
- > Charcoal as standard, alternative colours on request.
- > Supplied ready to assemble.
- > Table top not included.

# Dialock

## Access control

Dialock makes locking and unlocking amazingly easy. Using a single key card the guest can open all doors, cabinets and areas that are intended for him. And only those. A convenient and also secure experience.

The reason: The credit card-sized key operates touchlessly and without wear and reliable data communication.

Dialock is easy for you as well - from planning to operation. Hafele is a pioneer in RFID technology, and an experienced partner at your side in every respect! This is based on decades of experience in project servicem engineering expertise and a close connection to the market.

Dialock is an economically sensible and future-proof investment - above all, because the system is flexible and reliable.

## Dialock with RFID

- > Pass the key card past the door or wall terminal.
- > The system receives the identification from the card by radio.
- > The terminal receives the 'access granted' signal from the system.

# Kitchen Accessories

## Accessible functionality

Functionality in the kitchen doesn't need to be limited to appliances. With the right kitchen accessory you can increase the usability and accessibility of stored items, from the blind corner cupboard to the tall pull-out pantry. Increased access is the result.

# Kitchen Accessories

## Pantry

- > With capacity of up to 100kg within a narrow cupboard the Dispensa pantry with its full extension runner system provides easy access and organisation in a small space.
- > Shelves are height adjustable.

## Dispensa Junior III

- > Even below benchtop height the Dispensa Junior allows access to everyday items with its full extension runner system.
- > Shelves are height adjustable.

## LeMans II

- > The LeMans II corner unit with its unique and patented running action means no more wasted space in the blind corner of your kitchen.
- > Independently operating shelves allow easy access to stored items.

## iMove

- > The iMove mechanism for retro fitting to existing overhead cupboards provide additional accessibility to tall or overhead cupboards.

# Kitchen Accessories

## Pantry box

- > The pantry box installed in your drawer provides the perfect solution for storing of fresh ingredients like fruit, vegetables and even bread.

## One2Five waste bin

- > Our extensive range of pull-out waste bins provides endless solutions for your kitchen.
- > A comprehensive range of bins for any application is shown on our website.

## Benchtop protection rails

- > Protection rails for mounting to benchtops adds heat proof standing of pots next to cooktops and for pull out shelves under wall mounted ovens.

## Salice shelf runner

- > Full extension pull out shelf runner for mounting below wall oven/microwave for easy transition to benchtop.

# LOOX LED Lighting

## Lighting made easy

Häfele Connect is the new system for intelligent and wireless light control, creating the perfect atmosphere for many different situations with light.

The Loox LED Lighting offers optimum solutions for any requirement. With Häfele Connect, you can connect and control all components centrally and design the light effects to suit the occasion. Control is effortless using a smartphone or tablet. The Häfele Connect app connects itself to the Connect BLE boxes via Bluetooth.

Häfele Connect provides a comprehensive range of control options, including control of the light colour with RGB lights or adjustment of the colour temperature with multi white lights. Different lights can be grouped together, allowing many scenarios to be stored and time-controlled or called up with a simple finger press. Simple and elegant.

## High level of stability & consistent design

### Nova Pro Scala

- > Timeless design: Nova Pro Scala has an elegant and slim edge without interrupting the design outline.
- > Three distinct and modern finishes: Ice, Stone and Silver. The possibilities are almost endless.
- > Perfect movement: The track-proven Nova Pro slide has excellent running characteristics with load ratings up to 70 kg.
- > Closing comfort: Smooth closing action with new Soft-close technology and very low opening forces.
- > With an opening force of 20N, the Grass Nova Pro Scala drawer is perfect for age care.
- > Push to Open mechanism can be retrofitted.

# Door Hardware

## StarTec designer series, lever handle range

Introducing the StarTec Designer Series lever handle range by Häfele. This collection has always been synonymous with innovation and functionality. Now Häfele is offering an extended assortment of superior finishes within the collection. The StarTec Designer Series will now boast 5 superb finishes to choose from; Satin Stainless Steel, Polished Stainless Steel, Satin Brass, Antique Brass and Graphite Black.

These finishes are available in a range of 7 superior quality lever designs, a choice to suit any project. Each finish will also offer a complete solution with matching escutcheon, door stop, hinges and door closer.

The StarTec Designer Series lever handle range by Häfele is supported by a comprehensive 10 year warranty. This confirms our trust in the quality and function of this exciting new development.

# Lever Range

## Torquay

- > The Torquay lever handle is elegantly tapered for a refined aesthetic. Clean lines and fine detailing are the essence of this lever, it pairs well with many finishes, making this handle a popular choice for any project.

## Prevelly hollow

- > This classic lever style comes to life when paired with one of our Startec designer finishes. Its relatively subtle form blends cohesively with many applications.

## Coogee

- > The Coogee lever is bold and powerful in appearance, softening the robust style of this handle are subtly curved edges and a thin handle profile.

## Noosa

- > Taken from its namesake the Noosa lever has drawn inspiration from nature, modelled around the curve of a wave this handle is not only appealing it is comfort by design.

Accessible functionality

# Automatic Doors

## ECTurn

- > Smaller and less heavy swing doors on the interior can be automated with little effort using the ECTurn drive. The ECTurn is ideal for creating a barrier-free home. In addition, the ECTurn Inside can be integrated in the door leaf or frame.
- > Suitable for entry and internal doors.
- > 60mm pelmet.

## EMD-F

- > Slimdrive EMD-F series blend almost invisibly into any building architecture. Both drives work quietly and are low-maintenance. The convincing features are maximum accessibility, functional diversity and design. It even opens large and heavy single and double-leaf doors easily. The Smart swing function also allows manual door opening without effort.
- > EMD-F is commonly used on fire rated doors in apartment projects.

Door solutions

# Sliding Applications

## In hospitals, doctor's offices and therapy centres

Healthcare is changing like never before. Nowadays, patients expect consistent quality - from medical treatment to the spatial experience which has a considerable influence on the success of therapy. At the same time, processes must become increasingly efficient.

Our sliding solutions must prove themselves in harsh everyday hospital life, and fulfil an extremely wide range of demands. They must provide freedom from barriers, for example. This becomes possible by means of ergonomic door openings with sliding solutions, which are appreciated by wheelchair users and nurses moving hospital beds.

Sustainable and lasting products whose running costs are minimized by being low maintenance and having long service intervals help everyday processes to run smoothly. The demand for a high degree of cost-effectiveness is met by making efficient use of space. This makes it possible to have more patient and treatment rooms in a perfectly used layout.

The main focus is on people. Ones who are to remain or become healthy and the people who are going to take care of this. Sliding applications support both of them.
