LOOX5

The Häfele Loox5 Easy Order Guide brochure brings you our most common lighting combinations in an easy to understand format. Your lighting inspiration, easy order guide!

We have spent approximately 100,000 hours working with LED lights, researching and developing. We have had many valuable discussions with our partners in trade and industry – and we have learned a great deal. The market is demanding digital solutions.

After four generations of Loox LED lights the result is not simply advanced development but it has brought our Loox LED lighting to the next level. The world is accelerating and the demands of our customers along with it. Our development has accelerated to exceed those demands.

The experience of four generations.

We are driven by the same questions
time and time again.

How can it be made easier?
How can it be made better?
How can it be made more intelligent?

A large, stylized number '5' in a yellow-to-white gradient, positioned on the left side of the page. To its right is a large, empty white rectangular box.

Welcome to the innovative Loox5
Engineered by Häfele.

**Easy.
Logical.
Linear.**

Supplying.

Output current 5 A. Suitable for longer installation routes.
Engineered by Häfele.

Distributing.

Wired.

6-way distributor for monochrome lights. With connector for all standard switches from the Loox product range.

Straight down the line.

Networking.

Wireless.

Häfele Connect Mesh 6-way distributor.
For RGB, multi-white and monochrome
lights. Engineered by Häfele.

Illuminating.

Equipped with high-quality LEDs
made by Samsung.

RGB, multi-white, monochrome light.
The Häfele Connect Mesh 6-way distributor
controls everything. At once. Wireless.

Intelligent light, intelligently solved.

All-in-one

**The Loox5
light control.**

Häfele Connect Mesh 6-way distributor.

Häfele Connect Mesh
App

Häfele Connect Mesh
push button, wall mounted

Häfele Connect Mesh
remote control

Control light and configure the lighting individually – it's that simple with the Loox5 system: all of the Loox5 lights installed in the house "register" in the Häfele Connect Mesh App and are integrated into the app interface in just a few steps. Now the lights can be individually activated, dimmed, their light colour can be changed, or they can be

simply switched on and off. At the same time, different lighting scenarios can be created and saved. Operation can take place completely in accordance with requirements: via the app, via remote control or using wall-mounted push buttons. Integrating the Häfele Connect Mesh 2-channel interface also makes every standard wall-mounted

push button compatible with the app. Loox5. A modular networking kit which can be described with one word: EASY.

Light is easy.

Few criteria.
Many solutions.

Light colour	Monochrome Multi-white RGB
Light intensity	Task light Ambient light Accent light
Light source	Linear light Point light
Alignment	Directly or indirectly Up or down Forward or backward To the side
Position on the cabinet	Outside Inside
Installation type	Recess mounted Surface mounted

Light in the sleeping area.

Ambience full of atmosphere for rest areas.

Light in the kitchen.

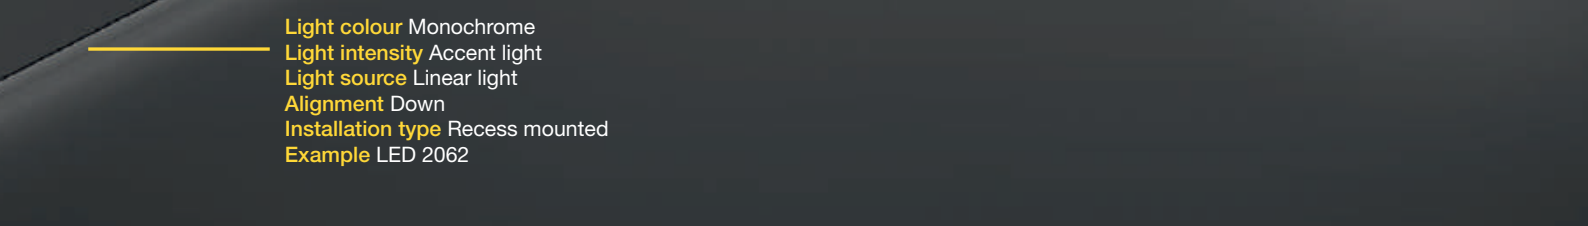

Functionality for every action.

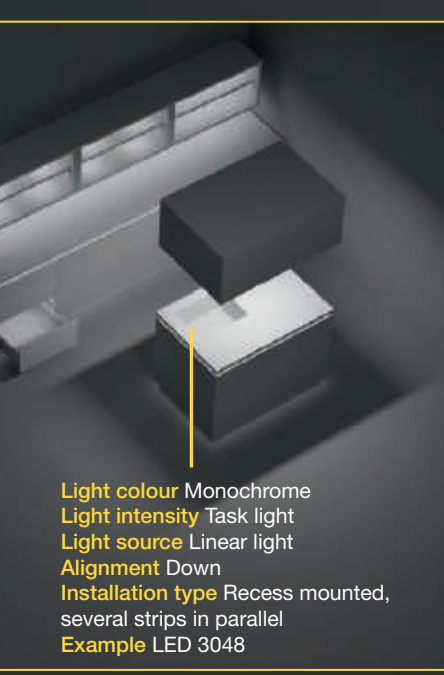

Light colour Monochrome
Light intensity Ambient light
Light source Linear light
Alignment To the side
Installation type Attached at the side to the circular mounting plate behind the mirror
Example LED 3040, just 5 mm wide for slim design applications

Light in the storage space.

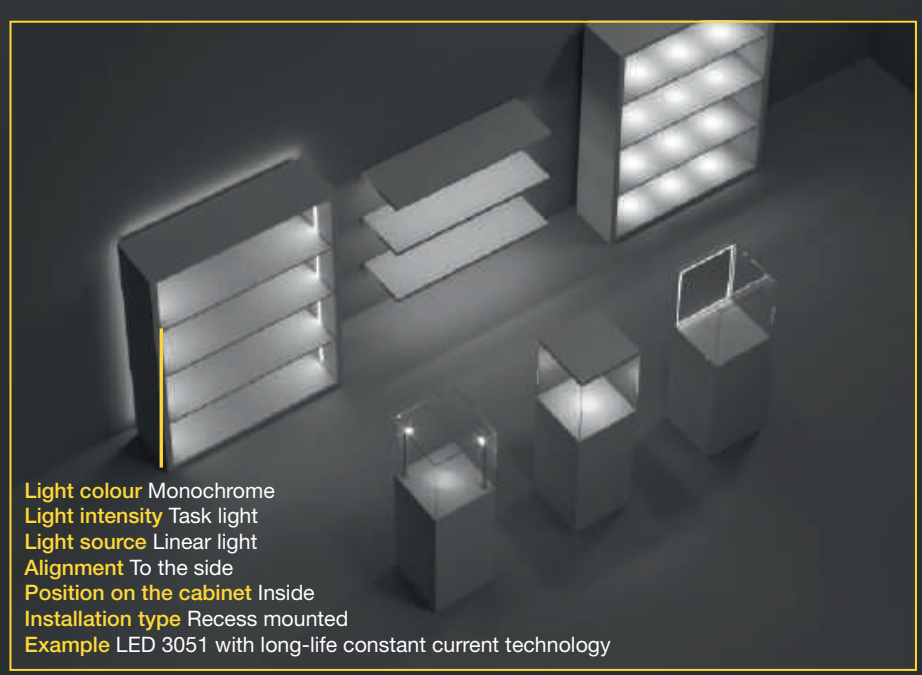

Orientation for perfect organisation.

Light colour Monochrome
Light intensity Accent light
Light source Linear light
Alignment Down
Installation type Recess mounted
Example LED 2062

Light colour Monochrome
Light intensity Task light
Light source Linear light
Alignment Down
Installation type Recess mounted, several strips in parallel
Example LED 3048

Light colour Monochrome
Light intensity Task light
Light source Linear light
Alignment To the side
Position on the cabinet Inside
Installation type Recess mounted
Example LED 3051 with long-life constant current technology

Light in store fixtures.

Value for the presentation of goods.

Light is plannable.

The need to observe only a few planning steps structures and simplifies the planning of lighting in furniture.

Illuminating.

At the start of the development process, determine the lighting purposes of the furniture (multiple choices possible)

- > **Task light for pleasant and safe working**
- > **Ambient light for highlighting, staging or emotionalising**
- > **Accent light for storage spaces or paths**

Also take into account the overall brightness of the room and the finishes to be illuminated: Sufficiently bright ceiling lighting or sunlight makes the orientation light unnecessary during the day, but at night it may be very pleasant if the ceiling lighting does not need to be used and a few furniture pieces provide some orientation light.

For confidence in the planning process, test lighting and finishes or use bright lighting with dimmers to achieve a balance of incident light and reflection.

The form factor of a light (linear, point) and the number used affects the planarity of the illumination. Light colour, installation type, position on the cabinet, and alignment are further criteria to select the perfect light.

Extending.

Häfele Loox5 drivers supply not only lights, but also charging stations (inductive and USB), audio systems, as well as electrically operated flap fittings, sliding doors, or TV lifts. Take advantage of the potential of Häfele Loox5. Create furniture that can do more than simply look good.

The chapter structure of the Loox brochure simplifies the ordering process by using this simple planning process.

Take advantage of the potential of Häfele Loox5 and create furniture that can do more than simply look good.

Switching.

Plan switch requirements and switch positions. Simple mechanical switches or convenient sensors and dimmers can be grouped together by means of multi driver or multi switch boxes to conveniently operate lights from a single location or from different locations.

.....

Networking.

The Häfele Connect Mesh 6-way distributor is the central element for controlling monochrome lights, multi-white lights, or RGB lights individually or jointly. 6-way distributors can be networked. They can be controlled by remote control, wall-mounted push button, or app.

.....

Distributing.

Plan the concealed cable routing and provide holes, grooves, or panels. An extensive range of extension leads and distributors facilitates suitable cabling of your project.

.....

Supplying.

Add up the wattage of all lights and other devices.

If necessary, take into account possible later expansions and select a driver of the appropriate performance class. Lights of the same voltage type or current may be connected to a common driver. Converters are also available and are necessary if lights with different voltage types and currents will share a driver.

Choose a distributor for your current needs (with or without switching function or with Häfele Connect Mesh). The distributor can be easily replaced at a later time. Therefore, make sure the drivers are accessible in the furniture.

Linear light

For universal use in furniture.

Good reasons.

- > Continuous light line with homogeneous light distribution
- > Minimalistic design
- > Virtually invisible, glare-free light source
- > Easy installation

For every situation.

- > Radiant task light for work spaces
- > Discreet ambient light for wellness zones
- > Splash-proof silicone strip lights for bathroom applications
- > Plastic profiles for vertical illumination in storage spaces
- > Aluminium profiles in trendy colours for top-of-the-line design demands

Constant current technology

- > Achieves uniform brightness over the entire strip light length
- > Increased life time, higher visual strip length, higher luminous efficacy

Equipped with high-quality Samsung LEDs

- > Dimmable: Yes
- > Material: Plastic
- > Finish/colour: White
- > Width: 8 mm
- > Height: 1.5 mm
- > Life time L80/B10: >70,000 h
- > Energy efficiency class: A+
- > Degree of protection: IP20
- > Mounting: Self-adhesive
- > Supplied with: 1 roll

Order reference:
Please order lead separately.

Aluminium profile recommended from 9.6 W/m, see page 20

- Cut LED strip light to length
(one contact side remains on the remainder piece; reusable)
- Connect LED strip lights
(two contact sides required)

C = section length
P = length of contact surface

LED strip lights

RGB, 10 mm

Häfele Loox5 LED 2080/3080

LED 2080/3080

- > Dimmable: Yes
- > Material: Plastic
- > Finish/colour: White
- > Width: 10 mm
- > Height: 2.4 mm
- > Energy efficiency class: A+
- > Degree of protection: IP20
- > Mounting: Self-adhesive
- > Supplied with: 1 roll

! Order reference:
Please order lead separately.

➔ Aluminium profile recommended from 9.6 W/m, see page 21

- Cut LED strip light to length
(one contact side remains on the remainder piece; reusable)
- Connect LED strip lights
(two contact sides required)

C = section length
P = length of contact surface

5 12 V Loox5 12 V driver see page 100

5 24 V Loox5 24 V driver see page 101

⚙️ Colour control only via 6-way distributor Häfele Connect Mesh with RGB adapter and remote control or smartphone.
Please order separately, see chapter Networking, page 77.

Häfele Loox5 LED 2080/3080

Milky	833.74.781
Version: Flush, for sliding in	
Frosted	833.72.858
Milky	833.72.859

Simple replacement of existing diffusers in order to switch from frosted to milky, e.g.. Cannot be used for the following aluminium profiles: 833.74.812, 833.74.813, 833.74.814 or for aluminium profiles with curved diffusers.

Häfele Loox cooling strip

- > Material: Aluminium
- > Length x width: 1000 x 10 mm
- > Height: 2 mm
- > Mounting: For screw fixing, drill holes at 250 mm, 500 mm, and 750 mm
- > Supplied with: 1 profile

	Cat. No.
Cooling strip	833.77.700

Recess/surface mounted downlights

Modular monochrome, drill hole Ø: 58 mm

Häfele Loox LED 2025, Loox5 2092/3092

LED 2092 and LED 3092, equipped with high-quality Samsung LEDs

- > Dimmable: Yes
- > Material: Aluminium
- > Energy efficiency class: A+
- > Degree of protection: IP44 as recess mounted downlight; IP20 as surface mounted downlight
- > Mounting: For mounting in drilled hole, for clamp fixing or for screw fixing
- > Drill hole Ø: 58 mm
- > Supplied with: 1 light module

! Suitable for 32 mm series drilled holes

Dimmer interface

Häfele Loox dimmer interface 1–10 V, modular – for 12 V, 24 V and 350 mA systems

Installation example: Wall dimmer with 1–10 V control output. No connection of the dimmer to mains voltage!

Installation example: Multi driver boxes for controlling several drivers (12 V, 24 V) or distributors with switching function. No connection of the dimmer to mains voltage!

Design advantage

> Wall dimmers can be used for the control of furniture lights in the design of the house installation

- > Length x width: 68.9 x 34.7 mm
- > Height: 13.5 mm
- > Degree of protection: IP20
- > Supplied with: 1 dimmer interface

	Cat. No.
Dimmer interface 1–10 V, modular	833.89.144

Use dimmer only, if monochrome lights are connected. Not suitable for the connection of converters or control devices. Direct connection to a normal household dimmer with a 1–10 V control output and connection via a lead with snap-in connector for modular switches to the switching input of a 12 V or 24 V Loox driver or a distributor. Please order lead with snap-in connector for modular switches driver separately.

Lead with snap-in connector for modular switches

Length mm	Cat. No.
500	833.89.140
1000	833.89.141
2000	833.89.142

Drill hole Ø for plug: 12 mm

Multi switch box

Häfele Loox multi switch box

- (A) Switch
(B) Multi switch box
(C) Driver

1 LED driver operated by up to 3 switches. Allows the LED driver or distributor with switching function to be switched on and off from different positions.

Häfele Loox extension lead for switches

> Function:

2 operating modes can be selected using an integrated toggle switch.
Cross circuit: On/off switching at different switches
Deactivated cross circuit: Switching on with switch 1, 2 or 3.
For switching off, all switches that were switched on have to be activated again

- > Material/colour: Plastic, black
- > Length x width: 55 x 45 mm
- > Height: 16 mm
- > Degree of protection: IP20
- > Supplied with: 1 multi switch box
With 1 m lead for switch

Standby power consumption W

≤0.3

Cat. No.

833.89.066

Lead from multi boxes to switching input

Length mm	Supplied with	Cat. No.
500	1 lead	833.89.068
2000	1 lead	833.89.069

Cannot be used in combination with dimmer 833.89.043
Drill hole Ø for plug: 12 mm
Alternative to the supplied 1 m lead
For multi switch box.
The drill hole Ø for the male plug and the female socket of the switch leads is 12 mm.

- > Length: 2000 mm
- > Supplied with: 1 lead

	Cat. No.
Extension lead for switch	833.89.067

Drill hole Ø for plug: 12 mm
Can also be used for the multi switch box and the multi driver box.
The maximum lead length of a switch is 6 m.
The drill hole Ø for the male plug and the female socket of the switch leads is 12 mm.

Multi driver box

Häfele Loox multi driver box

Up to 3 LED drivers with different voltages or distributors with a switching function can be controlled with 1 switch. Several lights in the room can be switched on and off with one switch. These can also be 3 of the same driver if you require additional power in a 12 V system, for example.

Häfele Loox extension lead for switches

- > Finish: Plastic, black
- > Length x width: 50 x 40 mm
- > Height: 19 mm
- > Supplied with: 1 multi driver box with 3 x 1 m lead for switch

Standby power consumption W	Cat. No.
1.5 W	833.89.061

! Max. 3 x 75 W per multi driver box.

+ Lead for multi boxes to switching input

Length mm	Supplied with	Cat. No.
500	1 lead	833.89.068
2000	1 lead	833.89.069

! Drill hole Ø for plug: 12 mm

Alternative to the supplied three 1 m leads for multi driver box.

The drill hole Ø for the male plug and the female socket of the switch leads is 12 mm.

- > Length: 2000 mm
- > Supplied with: 1 lead

Extension lead for switch	Cat. No.
	833.89.067

! Drill hole Ø for plug: 12 mm

Can also be used for the multi switch box and the multi driver box.

The maximum lead length of a switch is 6 m.

The drill hole Ø for the male plug and the female socket of the switch leads is 12 mm.

Networking

Häfele Connect Mesh

Häfele Connect Mesh consists of components for the smart control of lights and electrically operated fittings in furniture – with optional integration of the electrical installation of buildings.

Mesh means networking, and it uses the Bluetooth® Mesh network technology by the Bluetooth® Special Interest Group, which has the potential to become the global smart building standard.

The advantages are:

- > **Scalable:** From the simple remote control of a furniture light to complex concepts in hotels or store fixtures
- > **Fail-safe:** All nodes in the network forward control information
- > **Protected:** Individual network key on your personal mobile device
- > **Standardised:** Bluetooth® is a globally accepted and widely used technology

Häfele Connect Mesh active components

> Sensor

- ① Mobile device with Häfele Connect app
- ② Remote control
- ③ Push button, wall mounted
- ④ Loox switch (switching function programmable via app)

> Actuator and sensor

- ⑤ 2-channel interface: 2 switching input ports (switching function programmable via app)
Output port 80–230 V
- ⑥ Häfele Connect Mesh 6-way distributor

Passive components without networking function

- ⑦ Driver
- ⑧ Monochrome light or electrically operated fitting
- ⑨ Multi-white adapter
- ⑩ Multi-white light
- ⑪ RGB adapter
- ⑫ RGB light

Distributor

Häfele Connect Mesh 6-way distributor, with switching function

- > Control several light colours on one box.
- > Each output port can be controlled individually.

- > Area of application: For on/off switching and dimming (0–100%) of monochrome lights; or, in conjunction with adapters, for the operation of multi-white lights, RGB lights, and electrically operated fittings
- > Version: With programmable switching input
For standard Loox switches (switching function programmable via app; each active component can control each passive component, see page 97)
- > Material: Plastic
- > Colour: Black
- > Dim. (L x W x H): 120 x 50 x 16 mm
- > Number of connections: 1x input port with box to box plug
1x output port with box to box socket
1x input port switch socket
6x output ports device sockets (2-pin)
can be controlled from any active component of the network
- > Supplied with: 1 distributor

Voltage	Max. connected wattage W	Cat. No.
5 12 V	60	850.00.042
5 24 V	90	850.00.043

MESH

Häfele Connect Mesh App

- > Detects and reports new nodes in the network independently
- > Intuitively assign functions to switches
- > Set up light groups and scenes
- > Share your protected access with others
- > The Häfele Connect Mesh App is free for Apple iOS® and Android™.

- ! The distance between the smartphone or tablet to the nearest Häfele Connect Mesh component is approx. 10 m.
Multiple components create a network, and can also be placed approx. 10 m apart.

- + Please order adapter for multi-white lights, RGB lights, or electrically operated fittings separately, see page 79

- ➔ 6-way distributor for monochrome lights or other 2-pin devices, such as electrically operated fittings, see page 84

Adapters

Häfele Loox5 multi-white adapter for Häfele Connect Mesh 6-way distributor

- > Area of application: For connecting multi-white lights to the Häfele Connect Mesh 6-way distributor
- > Material/colour: Plastic, black
- > Dim. (L x W x H): 70 x 30 x 14 mm
- > Number of connections: 2x input port with plug, monochrome 6x output ports device sockets, multi-white
- > Supplied with: 1 distributor with 80 mm lead

Voltage	Max. connected wattage W	Cat. No.
5 12V	60	833.95.745
5 24V	90	833.77.830

! 1 multi-white adapter occupies 2 output ports at the 6-way distributor.

Häfele Loox5 RGB adapter for Häfele Connect Mesh 6-way distributor

- > Area of application: For connecting RGB lights to the Häfele Connect Mesh 6-way distributor
- > Material/colour: Plastic, black
- > Dim. (L x W x H): 70 x 30 x 14 mm
- > Number of connections: 3x input port with plug, monochrome 6x output ports for device sockets, RGB
- > Supplied with: 1 distributor with 80 mm lead

Voltage	Max. connected wattage W	Cat. No.
5 12V	60	833.95.746
5 24V	90	833.77.831

! 1 RGB adapter occupies 3 output ports at the 6-way distributor.

Häfele Connect Mesh adapter for electrically operated fittings

- > Area of application: For connecting electrically operated fittings to the Häfele Connect Mesh 6-way distributor.
- > Supplied with: 1 distributor

Voltage		Number of connections	Cat. No.
5 12V	TV lift adapter	Occupies 2 output ports	850.00.057
	eDrive 2 doors adapter	Occupies 2 output ports	850.00.058
	eDrive 3 doors adapter	Occupies 3 output ports	850.00.059

Remote controls

Häfele Connect Mesh remote control

Easiness

- > **One remote control for all applications: monochrome lights, multi-white lights, RGB lights and electrically operated fittings**

- > Area of application: For controlling components at the Häfele Connect Mesh 6-way distributor
- > Function: Easy, direct pairing with a 6-way distributor or programming of buttons via app to control each node of the network
- > Version: Multi-function control panel
- > Material: Plastic
- > Colour: Top shell: Black, lower shell: White
- > Dim. (L x W x H): 130 x 42 x 11 mm
- > Supplied with: 1 remote control

	Cat. No.
Remote control	850.00.040

Please order Häfele Connect Mesh 6-way distributor separately. Please order 2 replaceable CR2032 button cell lithium batteries (2 x 002.99.032) separately.

Häfele Connect Mesh push button, wall mounted

- > Area of application: For controlling components on the 6-way distributor, Häfele Connect Mesh (all functions that are accessible by pressing or holding a button)
- > Function: Easy, direct pairing with a 6-way distributor or programming of buttons via app to control each node of the network
- > Version: 4-button panel
- > Material: Plastic
- > Colour: Pushbutton: Black, frame: White
- > Dim. (L x W x H): 81 x 81 x 12 mm
- > Mounting: For screw fixing or glue fixing to any wall
- > Supplied with: 1 push button, wall mounted

	Cat. No.
Push button, wall mounted	850.00.041

Please order Häfele Connect Mesh 6-way distributor separately. Please order 1 replaceable CR2430 button cell lithium battery (1 x 002.99.034) separately.

Interface electrical installation

Häfele Connect Mesh 2-channel interface, with potential free relay

Installation example

Installation in a deep switch box

Design advantage

- > Use switches in the design of the house installation for the control of furniture and room lights with Häfele Connect Mesh

- > Area of application: For on/off control of room lighting or other home installations via the Häfele Connect Mesh and for integrating conventional wall-mounted push buttons into the Häfele Connect Mesh
- > Version: Function programmable via app, each active component can control each passive component, see page 77.
- > Number of connections: 2 switching input port for conventional wall-mounted push buttons (double-throw), 1 output port for on/off switching of 80–230 V, 3 A (can be controlled from any active component of the network)
- > Material: Plastic
- > Dim. (L x W x H): 39 x 44 x 21 mm
- > Mounting: Suitable for installation in switch boxes. Recommended switch box depth: 60 mm.
- > Supplied with: 1 2-channel interface

2-channel interface

Cat. No.

850.00.046

Distributors

Häfele Loox5 box to box 6-way distributor

Plug connection box to box

- > The connection of the distributors with the driver can be done via a box to box plug-in connection or via an extension lead. Any number of distributors can be connected to the driver. Observe maximum wattage!

- > **Häfele Connect Mesh 6-way distributor: Chapter Networking**, see page 77

Häfele Loox5 box to box 6-way distributor with switching function

1 switch controls all output ports

- > Material: Plastic
- > Colour: Black
- > Dim. (L x W x H): 120 x 50 x 16 mm
- > Number of connections: 1 x input port with box to box plug
1 x output port with box to box socket
1 x input port switch socket
6 x output ports device sockets
- > Supplied with: 1 distributor

Voltage	Max. connected wattage W	Box to box with switching function
5 12 V	60	833.95.748
5 24 V	90	833.77.833

Häfele Loox5 box to box 6-way distributor without switching function

- > Dim. (L x W x H): 120 x 50 x 16 mm
- > Number of connections: 1 x input port with box to box plug
1 x output port with box to box socket
6 x output ports device sockets
- > Supplied with: 1 distributor

Voltage	Max. connected wattage W	Box to box without switching function
5 12 V	60	833.95.747
5 24 V	90	833.77.832

Häfele Loox5 6-way distributor without switching function

Can also be connected to 6-way distributor

- > Material: Plastic
- > Colour: Black
- > Dim. (L x W x H): 70 x 30 x 14 mm
- > Number of connections: 1 x input port with box to box plug
1 x output port with box to box socket
6 x output ports device sockets
- > Supplied with: 1 distributor

Voltage	Max. connected wattage W	Without switching function
5 12 V	60	833.95.786
5 24 V	90	833.77.839

Extension leads

Häfele Loox5 extension leads

Maximum lead length from the Loox5 driver to the device is 10 m.

Long cable lengths in combination with large loads (strip light lengths) can result in voltage losses in the cable. These lead to visible loss of brightness in the lights. The illuminance listed with the lights has been determined with the rated output voltage of the driver. (12 V or 24 V).

Häfele Loox5 extension leads monochrome

- > Area of application: For monochrome lights and other 2-pin devices and distributors
- > Material: Plastic
- > Current carrying capacity: Max. 5 A
- > Drill hole Ø: Plug 8 mm, socket 13 mm
- > Supplied with: 1 extension lead
1 plug/1 socket

Type of cable 20	Voltage	500 mm	1000 mm	2000 mm
Monochrome (2-wire 18 AWG)	5 12 V	833.95.712	833.95.713	833.95.714
	5 24 V	833.95.719	833.95.718	833.95.717

Häfele Loox5 extension leads multi-white

- > Area of application: For multi-white lights
- > Material: Plastic
- > Current carrying capacity: Max. 3.5 A
- > Drill hole Ø: Plug 9 mm, socket 13 mm
- > Supplied with: 1 extension lead
1 plug/1 socket

Type of cable	Voltage	500 mm	1000 mm	2000 mm
Multi-white (3-wire 20 AWG)	5 12 V	–	–	833.95.715
	5 24 V	–	–	833.95.720

Häfele Loox5 extension leads RGB

- > Area of application: For RGB lights
- > Material: Plastic
- > Current carrying capacity: Max. 3.5 A
- > Drill hole Ø: Plug 9 mm, socket 13 mm
- > Supplied with: 1 extension lead
1 plug/1 socket

Type of cable	Voltage	500 mm	1000 mm	2000 mm
RGB (4-wire 20 AWG)	5 12 V	–	–	833.95.716
	5 24 V	–	–	833.95.721

Extension leads

Häfele Loox5 4-way extension leads

- > Area of application: For monochrome lights and other 2-pin devices and distributors
- > Current carrying capacity: Max. 5 A
- > Drill hole Ø: Plug 8 mm
- > Supplied with: 1 extension lead
1 plug/4 sockets

Type of cable	Voltage	Length mm	2000 mm
Monochrome (2-wire 18 AWG)	5 12 V	6500	833.95.742
	5 24 V		833.95.743

! Maximum lead length from the Loox5 driver to the device is 10 m. Long cable lengths in combination with large loads (strip light lengths) can result in voltage losses in the cable. These lead to visible loss of brightness in the lights. The illuminance listed with the lights has been determined with the rated output voltage of the driver.
(12 V or 24 V).

Häfele Loox5 lead for modular lights and other modular devices

- > Area of application: For monochrome lights and other 2-pin devices and distributors
- > Version: With snap-in connector
- > Current carrying capacity: Max. 1.5 A
- > Drill hole Ø: Plug 8 mm
- > Supplied with: 1 lead plug/plug

Type of cable	Voltage	Length mm	Cat. No.
Monochrome (2-wire 24 AWG)	5 12 V	1000	833.95.789
		2000	833.95.788
	5 24 V	2000	833.95.791

Häfele Loox5 lead for modular multi-white lights

- > Area of application: Modular multi-white lights
- > Version: With snap-in connector
- > Current carrying capacity: Max. 1.5 A
- > Drill hole Ø: Plug 9 mm
- > Supplied with: 1 lead plug/plug

Type of cable	Voltage	Length mm	Cat. No.
Multi-white (3-wire 24 AWG)	5 12 V	2000	833.95.787
	5 24 V	2000	833.95.790

Switch leads

Häfele Loox extension lead for switches

- > Area of application: Switches and modular switches
- > Drill hole Ø: Plug 12 mm
- > Supplied with: 1 extension lead plug/socket

Length mm	Cat. No.
2000	833.89.067

The maximum lead length of a switch is 6 m.

Häfele Loox lead for modular switches

- > Area of application: Modular switches
- > Version: With snap-in connector

24 V: Loox socket/Loox5 plug

> Area of application:

For connecting Loox devices to Loox5 drivers or Loox5 distributors. Suitable for all devices with Loox plug, e.g. monochrome lights, distributors, charging stations, colour mixers for multi-white and RGB as well as electrically operated fittings, converters, etc.

> Length:

50 mm

> Current carrying capacity:

Max. 3.5 A

> Drill hole Ø:

12 mm

> Packing

6 pieces

Device	Driver	Max. connected wattage W	Cat. No.
12 V	5 12 V	Max. 42	833.95.753
24 V	5 24 V	Max. 84	833.77.838

Not suitable for 3-pin Loox plugs (multi-white) or 4-pin Loox plugs (RGB).

The current carrying capacity is limited to 3.5 A.
Observe maximum wattage!

Adapter

Loox5 driver > Loox device

Adapter for devices with Loox5 plug for connecting to Loox driver

12 V: Loox5 socket/Loox plug

24 V: Loox5 socket/Loox plug

- > Area of application: For connecting Loox5 devices to Loox drivers or Loox distributors. Suitable for all devices with 2-pin Loox5 plug, e.g. monochrome lights, distributors, charging stations, etc.
- > Length: 45 mm
- > Current carrying capacity: Max. 3.5 A
- > Drill hole Ø: 13 mm
- > Packing: 6 pieces

Device	Driver	Max. connected wattage W	Cat. No.
5 12 V	12 V	Max. 42	833.95.752
5 24 V	24 V	Max. 84	833.77.837

Not suitable for 4-pin Loox5 plugs (multi-white or RGB).
The current carrying capacity is limited to 3.5 A.
Observe maximum wattage!

Adapter leads for LED strip lights with Loox5 clip for connecting to Loox driver or colour mixer

Device	Driver/colour mixer	Length mm	for LED strip light	Cat. No.
5 12 V	12 V	2000	monochrome 5 mm	833.72.742
			monochrome 8 mm	833.72.716

5 24 V	24 V	2000	monochrome 5 mm	833.75.732
			monochrome 8 mm	833.75.705
			multi-white 8 mm	833.75.706
			RGB 10 mm	833.75.707

Cable routing

Häfele Loox cable channel

- > Dim. (L x W x H): 2500 x 12 x 7.5 mm
- > Application: Concealing visible cables in furniture and cabinets
- > Supplied with: 1 cable channel with adhesive tape

Finish	Cat. No.
Black, RAL 9005	833.89.033
Brown, RAL 8007	833.89.023
White, RAL 9010	833.89.013

Häfele Loox cable cover

- > Material: Plastic
- > Length: 2,500 mm
- > Application: For concealing visible cables in furniture and cabinets, for recess mounting
- > Supplied with: 1 profile

Finish	Cat. No.
Black, RAL 9005	833.74.797
Brown, RAL 8007	833.74.796
White, RAL 9010	833.74.795

Mirror

Multi dimensional mirror

Introduction

See your bathroom in a new light.

The multi-dimensional mirror comes fully assembled and unites the functions of make-up light, room lighting, mood lighting, mirror defogger and sound system in an elegant design.

Integrated touch keys make this unit easy to clean; brilliant light thanks to colour rendering index <90.

Mirror:

- > Can be mounted vertically or horizontally

Room and make-up lighting:

- > Warm white 2700 K, daylight white 4000 K or colour changing light, operated via touch keys

Background lighting (mood lighting):

- > Warm white 2700 K can be operated in combination with room lighting

Demister:

- > Warms the mirror to 10-25°C above the room temperature, preventing the mirror from fogging up, stand by function after 45 min, can be operated via touch keys

Sound operation:

- > Sound transducer uses mirror surface for sound development, can be operated with smartphone or tablet via Bluetooth®

Hotel app (Android):

- > For configuration of basic settings (max. volume and bass, mirror name, password)

Cool white (4,000 K)

Warm white (2,700 K)

Front light with memory function in cool white...

...and warm white

Mood lighting (2,700 K)

Indirect lighting option offers mood lighting.

Demister

Demister with standby function after 45 min.

Supplying

Central or decentralised supply

Central and compact

Driver with 6-way distributor via box to box plug-in connection for compact dimensions.

Decentralised

Driver at the entry point of a given socket position. Decentralised 6-way distributor via cable connection.

3-level control concept

Loox5 specialises the tasks: on the one hand, professional drivers with top performance in terms of energy efficiency, life time, overload protection, and rectification, and on the other hand, the 6-way distributor with a 3-level control concept that can be combined as desired:

Level 1

Distributor without switching function

Level 2

Distributor with switching function

Level 3

Distributor with switching function and Bluetooth® chip for the network control in the Häfele Connect Mesh

- > 6-way distributors see page 84
- > Häfele Connect Mesh 6-way distributor see page 78
- > Extension leads see page 85

EXTRA
SLIM

- > Version: With overload protection
- > Colour: Black
- > Degree of protection: IP20
- > Input voltage: 100–240 V~; 50–60 Hz
- > Output voltage: DC 12 V
- > Number of connections: 1x socket Loox5 12 V
- > Life time: >50,000 hours
- > Supplied with: 1 driver with mounting accessories

5 12V	Output power	Output current	Standby power consumption	Dim. (L x W x H)	Cat. No.
	W	A	W	mm	
1	20	1.67	≤0,2 W	140 x 50 x 16	833.95.000
2	40	3.33	≤0.3 W	191 x 60 x 16	833.95.002
3	60	5.00	≤0.3 W	230 x 70 x 16	833.95.003

! Ambient temperature –25 °C to +45 °C (60 W: 40 °C)
Ensure that there is a sufficient air supply and circulation at the mounting location.

! Maximum lead length from the Loox5 driver to the device is 10 m.
Long cable lengths in combination with large loads (strip light lengths) can result in voltage losses in the cable. These lead to visible loss of brightness in the lights. The illuminance listed with the lights has been determined with the rated output voltage of the driver.
(12 V or 24 V).

Country-specific main leads – 2 metre lead length, socket at the cable: C7

Powered sliding door hardware

Energy chain for Slido Classic 70 VF A – for 2, 3, 4 doors, right door front running

- ① Energy chain
- ② Connecting arm for running component
- ③ Connecting arm for track
- ④ Connection facility via pre-assembled lead

- > Material: Steel and plastic
- > Installation: For screw fixing behind running track and onto doors, drilling pattern remain unchanged

Application	Supplied with	Door width mm	Cat. No.
For 2 doors	2 energy chains 3 connecting arms with pre assembled leads	650-800	402.35.311
		801-1100	402.35.312
		1101-1600	402.35.313
		1601-2010	402.35.314
For 3 doors	3 energy chains 6 connecting arms with pre assembled leads	650-800	402.35.315
		801-1040	402.35.316
		1041-1100	402.35.317
		1101-1360	402.35.318
For 4 doors	4 energy chains 6 connecting arms with pre assembled leads	700-800	402.35.319
		801-1100	402.35.320

Slido Classic 50 VF P – allows synchronised opening

Running gear, rear door

Running gear, front door

- > Material: Running gears and guides: Steel, double running and guide track: Aluminium
- > Installation: Running gear and guide clip for screw fixing to door, guide for clip fixing, top running track for screw fixing to cabinet, bottom guide track for screw fixing to cabinet from outside, from inside optional

Application	Version	Supplied with	Cat. No.
For 2 doors	With clip-in door stopper	4 running guides 4 guides 2 stabilising blocks 2 clip-in door stoppers	400.51.532
For 3 doors	With clip-in door stopper	6 running gears 6 guides 2 stabilising blocks 3 clip-in door stoppers	400.51.533
For 4 doors	With soft and self closing mechanism on one side, 50 kg	8 running gears 8 guides 2 stabilising blocks 2 end stops 1 syncro unit 3 soft and self closing mechanisms with follower	400.51.564

- ! For full details please contact your local Häfele representative.

Slido F-Line E-Drive – for 2, 3, 4 doors

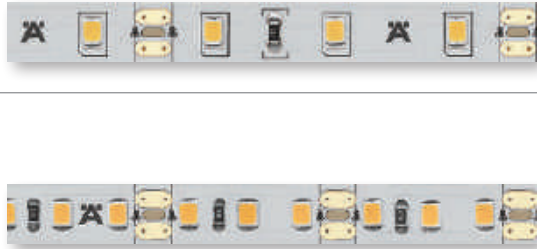

- ! > The centre door can only be opened in one direction when using sets for 3 doors.
- > Please order running guide tracks separately.

- > Material: Steel and plastic
- > Installation: For screw fixing behind running track and onto doors, drilling pattern remain unchanged

Application	Supplied with	Cab width mm	Cat. No.
For 2 doors	1 e-drive 2 connecting arms	1600-2400	400.51.211
		2400-4000	400.51.212
For 3 doors	1 e-drive 3 connecting arms	2500-3100	400.51.213
		3100-4000	400.51.214
For 4 doors	1 e-drive 3 connecting arms	2500-3100	400.51.215

Light shapes rooms.

Light in furniture is more than just accessories.

- Light in furniture is no longer an accessory
- which can be retrofitted later. Today, light has
- essential and imperative comfort functions in
- furniture.
- Contemporary furniture planning incorporates
- light as a focus right from the beginning in
- order to achieve the best possible result for
- customers.

Light changes spaces.

The interplay of light in rooms and light in furniture promotes a feeling of well-being.

Cooking.

Bright, neutral white light makes for a pleasant illumination of the important work spaces and ensures the proper reflection of the colour of food and products.

Eating.

The combination of direct, flat light for a perfect illumination of the dining table, supplemented with indirect, warm effect lights on ceilings and walls creates an atmospheric ambience.

Relaxation.

The interaction of areas of light and horizons created by light creates a comfortable and cozy atmosphere.

• Bright cool light promotes
• concentration, warm and
• dimmed light promotes
• relaxation.

Light and intensity.

When lighting a room, using a combination of several light sources is critical.

In the 1950s, Richard Kelly, a pioneer of lighting design, already differentiated between light to see – ambient luminescence, focal glow – the illumination of an object or area, and play of brilliants – in which the light itself is the object to observe.

Depending on the purpose for the lighting plan of a room and specific areas, task light is used. To create a specific ambiance ambient light is used.

Task light.

For example, the lighting need in a home office can differ and depends on the location of the desk as well as the influx of daylight. When work is done on computer or tablet a glare-free light source is required. Since the screen is the work area, a backlight can be sufficient. However, drawing or writing require a well lit work surface.

Ambient light.

To create an atmospheric ambience, the room light can also be used as indirect lighting in the furniture. Ambient light provides less illumination and serves to create an appealing environment. The light source is often hidden, for example it can be embedded in shelving or behind moldings. It is important that ambient light beams do not create brightly lit surfaces or produce sharp edges.

Light evokes emotions.

Light situations trigger associations: romantic, comfortable, relaxing and cold.

Staging.

Spotlights make the illuminated objects on shelves and showcases the focus. And wall wash light makes wall structures visible.

Highlighting.

Highlighting functional areas with even, bright light is a sensible addition to the general room light.

Setting accents.

The Loox lighting system offers many possibilities to set accents in a room. With the appropriate light composition corners, edges and surfaces can be dramatized.

With a smart lighting plan specific moods can be created in the living environment. The Häfele Loox system can turn a purposefully designed bathroom into a spa. Edge lighting creates an artificial horizon, dimmable spotlights create a candlelight atmosphere. Warm light creates a mood simulating a sunset.

Light and colour.

Light makes colour visible.

Light is made up of electromagnetic waves which only become visible to the human eye through reflection on objects. A red object reflects only the red colour. The other colours are absorbed. All light sources are tested and measured based on the accuracy of their colour reproduction, the so-called colour rendering index (CRI). The higher the CRI, the higher the quality of colour reproduction.

Warm light. Cool light.

The colour of the light, also referred to as colour temperature, controls our state of well-being. Light with a high blue component has an invigorating effect on the body. Just like the cool fresh light of an early morning. By comparison, strong red and yellow-coloured light has a relaxing effect and evokes a state of rest. Just like the warm glow in the late afternoon or a candle.

Consistent colour quality and performance.

An important factor for new technologies is the reliability in use.

Häfele has set high standards for the selection of materials, which are continually tested and certified internationally. Setting a narrow binning is one of them. All LEDs are tested and sorted to specified quality criteria after production. Häfele selects the highest quality class LEDs for maximum life time, energy efficiency and to ensure aftermarket replacement quality.

Light with effect.

Every room comes to life with light and shadows.

Linear light.

Linear illumination is created with LED strip lights. Inside cabinets and shelves, on work surfaces or enclosures of furniture, LED strip lights provide uniform light with a broad area of illumination.

Directional light.

Narrow beam Loox spotlights can create directional lighting effects to highlight specific objects. With surface mounted or built-in spotlights in a row it is possible to achieve flat surface illumination of specific areas. A special effect is created by overlapping cones of light.

Linear illumination can be used to create horizons. With direct light objects can be partially emphasized. Wall wash light can highlight and reinforce structures (stone structures, relief wallpapers).

Light and surfaces.

Depending on the material and structure a surface reacts differently to light. Light is partially absorbed, a part is reflected and depending on the surface it is scattered. With translucent or transmissive materials, the light can also shine through the body.

Depending on the material and structure a surface reacts differently to light.

Dark surfaces.

Dark materials absorb light, so it is necessary to use stronger light. However, too much light destroys the ambiance and comfort.

Bright surfaces.

A bright floor or bright materials reflect the light much better than dark materials. A brightly designed space therefore requires less overall light. Extra effect lighting adds freshness and a feeling of spaciousness to the room.

Light and control.

A Smart Home also includes the smart control of different lighting scenarios inside the building.

The Häfele Loox system offers several solutions for controlling lights; from the direct control via simple switching points to the remote control of more complex lighting scenarios.

In addition to the lighting, digital solutions can also be used to centrally operate and control the stereo, television, heating, alarm system and more.

Remote control of light.

Especially important is the control of light scenarios in multi-functional rooms. Depending on the application remote controls can be used for easy control of several light sources, from multi-white lights to coloured RGB lights.

Control light (and more) centrally.

An app connects and centrally controls all installed light components and allows the design of light effects individually with a smartphone or tablet. In this way multiple scenarios can be saved and programmed, or simply retrieved with just by finger tip.

Light effects and lighting technology

Cone of light

	>500 lx
	150–500 lx
	<150 lx

Note:

The illuminance symbol always represents the best value of all colour temperatures and is meant to be for quick guidance only. Please note the specific values of the individual colour temperatures and the refraction angle before ordering!

Recommendation for illumination of interior rooms

Interior room type	Illuminance in Lux at 500 mm	Colour temperature
Kitchen, dining area	300–500	2700–4000 K
Store fixtures, galleries	300–500	4000–6500 K
Bedroom, living room	200–300	2700–4000 K
Bathroom	200–500	3500–4000 K
Storage room	100	4000–5000 K
Orientation light, hallway, wardrobe	10–50	4000–5000 K

Protection classes

-  Protection class II
-  Protection class III

Degrees of protection

- IP20** Only for use in dry locations
 - IP44** Penetration by solid foreign bodies $\varnothing \geq 1$ mm is prevented. Water spray protection (water from all directions)
 - IP65** Dustproof, protection from water spray (jet) from any angle.
-  IP44 after installation
 IP65 after installation

Safety symbols

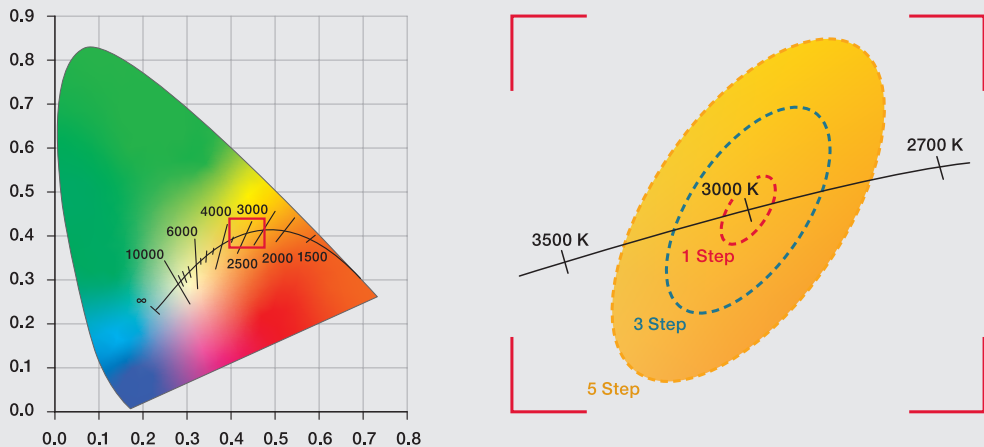

-  Installation permitted on or in furniture, whose ignition properties are unknown.
-  Max. surface temperature in case of fault
-  Lights to be used indoors only. Not to be used outdoors!
-  Do not use components that impede thermal radiation.
-  Waste of Electrical and Electronic Equipment. Do not dispose of in residential waste!
-  Driver, converts alternating current to direct current

Voltage supply

- SELV** Safety Extra Low Voltage
-  Independent operating unit for use outside of light without additional cover.
-  Short-circuit proof with safety isolation

Technical terms

Technical terms

Refraction angle	The refraction angle (beam angle) describes the angle between two imagined straight lines in a plane through the visual beam axis, whereby these straight lines go through the centre of the front of the lamp and through the points at which the illuminance is 50% of the illuminance on the visual beam axis.														
Illuminance	The illuminance is the luminous flux (lm) in relation to a surface (m ²) and it is indicated in Lux (lx). It is used to measure the brightness with which a surface is illuminated.														
Binning	During industrial manufacture, LEDs differ from each other with regard to colour, luminous flux (brightness) and forward voltage. In order to achieve consistent light quality with the same brightness level and a uniform light colour, they are therefore sorted according to colour, luminous flux and forward voltage and separated into bins ("containers") during manufacture. This sorting process is known as Binning. Häfele exclusively uses bins with a high degree of brightness in order to achieve high efficiency.														
Bluetooth® Mesh	Network technology which was introduced in 2017, based on Bluetooth® Low Energy, in which all components (controls, devices) form a joint network, which is ideal for controlling lights. Häfele Connect Mesh uses this technology.														
Energy efficiency class	The energy efficiency class provides information about the relevant energy consumption. Lamps and lights are categorised in classes E to A++. LED lights achieve the highest classes A to A++.														
Colour temperature and light colour	The colour temperature is a specification of the colour appearance of a white light source and is measured in Kelvin (K). The lower the colour temperature, the warmer the light colour; the higher the colour temperature, the cooler the light colour. White light sources with a colour temperature below 3400 K are considered "warm white" by Häfele, white light sources with a colour temperature between 3400 K and 5700 K are considered "cool white". White light sources above 5700 K are referred to as "daylight white".														
Colour consistency/ colour differences	<div>  </div> <p>Colour differences are specified in stages, so called "MacAdams Ellipses" or "SDCM" (Standard Deviation of Colour Matching). Häfele uses 3 SDCM binnings for its LED products. This is a good value, because it is statistically unlikely that LEDs with a maximum colour difference will be next to each other on the strip light or in the light and that the colour difference is visible. In its ErP directive, the EU Commission stipulates that 6 SDCMs may not be exceeded for LED products.</p> <table border="1"> <thead> <tr> <th>SDCM</th><th>Visibility</th></tr> </thead> <tbody> <tr> <td>1</td><td>Only people with extremely good vision can see the most minimal colour differences</td></tr> <tr> <td>2</td><td>Most minimal colour differences are visible</td></tr> <tr> <td>3</td><td>Very small colour differences are visible</td></tr> <tr> <td>4</td><td>Colour differences are visible</td></tr> <tr> <td>5</td><td>Significant colour differences are visible</td></tr> <tr> <td>>5</td><td>Very clear colour differences are visible</td></tr> </tbody> </table>	SDCM	Visibility	1	Only people with extremely good vision can see the most minimal colour differences	2	Most minimal colour differences are visible	3	Very small colour differences are visible	4	Colour differences are visible	5	Significant colour differences are visible	>5	Very clear colour differences are visible
SDCM	Visibility														
1	Only people with extremely good vision can see the most minimal colour differences														
2	Most minimal colour differences are visible														
3	Very small colour differences are visible														
4	Colour differences are visible														
5	Significant colour differences are visible														
>5	Very clear colour differences are visible														
Colour rendering index CRI	The colour rendering index is a parameter that can be used to compare the colour rendering quality of light sources at the same colour temperature. The higher the value, the better the colour rendering. A value of 100 corresponds to the colour rendering of daylight.														
Weighted energy consumption	The weighted energy consumption is rounded to two decimal places in kilowatt hours in relation to 1,000 hours of use. It applies to operation of the LED with an external driver. The calculation and publication of this value is defined by EU ordinance No. 874/2012.														

Technical terms

Constant current technology	The same current flows through each LED. That means that the brightness of all LEDs is the same, and a drop in luminous flux is prevented. This increases the maximum visual length of the strip lights.			
Life time	Specified in operating hours. The life time mainly depends on the warming of the products. The hotter the environment, the shorter the life time. The replacement rate in years is calculated from the total life time and the average operating time per annum. The following table can be used as a planning aid. The specified life time relates to L70/B50.			
	Indoor use	Annual operating time (EN 15193) hours	Replacement rate Years	Life time installation Hours
	Office	2,500	20	50,000
	Education	2,000	25	50,000
	Hospital	5,000	10	50,000
	Hotel	5,000	10	50,000
	Restaurant	2,500	10	25,000
	Shop	5,000	10	50,000
Life time L80/B10	L80 is the time after which the LED is still emitting 80 % of its original light. B10 means that 10 % of the LEDs may have less than 80 % of the original light output. Häfele tests all LEDs it uses in accordance with the LM-80 standard. LM-80 is a standardised testing method, which allows products to bear the EPA's (Environmental Protection Agency) Energy Star. The test is a manufacturer-independent comparison of LEDs. During the test the luminous flux (Lumen maintenance) of an LED is tested at three different temperatures for a minimum of 6,000 hours. Then the life time L80 is calculated by means of extrapolation. The extrapolation procedure is described in regulation IES TM-21.			
LED	A light-emitting diode (LED) is a semi-conductor element that emits light when electricity passes through it. This semi-conductor element consists of a crystal that is attached to a metal base, and both are encapsulated in protective plastic. LEDs are mostly based on inorganic, i.e. non-carbonic materials.			
Luminous efficacy	The luminous efficacy is the ratio of the luminous flux and the wattage absorbed. It is used to measure the operating efficiency of the light source. It is indicated in Lumen per Watt (lm/W).			
Luminous flux	It is indicated in Lumen (lm). The luminous flux indicates the light output, i.e. the quantity of light a source emits. The value may be subject to measurement and production-related fluctuations of ±10 %.			
Drop in luminous flux	The brightness of the LEDs on LED strip lights decreases with the length of the strip light due to the increasing resistance of the copper line. A drop in luminous flux from the first to the last LED of up to 30% is imperceptible to the human eye. That's why Häfele specifies a maximum strip light length for this visual value. Generally, it is possible to operate strip lights with longer lengths, but a difference in brightness will be visible. Exception: The LEDs of the strip lights with constant current technology (LED 2077/3050/3051/3052) always have the same brightness.			
Max. strip light length	Visual value Strip light length with an imperceptible drop in luminous flux of max. 30%. Wattage-dependent value Strip light length = output power of driver / wattage of the strip light per meter. If the wattage-dependent value is greater than the visual value, a difference in brightness will be perceivable. Exception: The LEDs of the strip lights with constant current technology (LED 2077/3050/3051/3052) always have the same brightness.			
Multi-white	The light colour of shades of white can be changed as required with Häfele Connect. Mesh, e.g. from warm white to cool white.			
RGB	RGB is the abbreviation for red, green and blue. In combination with Häfele Connect Mesh, almost any colour combination can be created from the three primary colours.			
RoHS – Lead in Loox products	Loox Products by Häfele are lead-free and adhere to the RoHS guidelines. RoHS is part of CE conformity. All Loox products are CE compliant. Häfele does not advertise the CE conformity in its catalogues, since only CE compliant products are allowed to be offered. The declaration of conformity is available online at www.hafele.com			
Transmittance	Ratio of transmitted light to incidental light. An ideal transparent body would have a transmittance of 100%.			

Technical questions

Technical questions

How do I clean an LED strip light?	LED strip lights without a silicone sleeve do not require cleaning. Silicone strip lights can be wiped down with a damp antistatic cloth. Scouring agents and aggressive cleaners can destroy the surface and attack the LEDs.																																				
May I use drivers from other manufacturers?	In order to ensure the safety and functionality of the installation, only Loox drivers or drivers that have been explicitly approved by Häfele may be used. If an electronics technician installs the system, Loox can also be connected and coupled with on-site electrical equipment. However, we explicitly point out that these tasks must be performed by a qualified electrician.																																				
What is the life time of the products in permanent operation?	Loox5 drivers >50,000 hrs. with max. ambient temperature (40 °C/45 °C), wall plug drivers 30,000 hrs. at an ambient temperature of max. 40 °C. Provide for sufficient air supply and circulation at the mounting location of the driver. Loox5 LED strip lights >50,000 hrs. at an ambient temperature of max. 45 °C. Cooling with an aluminium profile is recommended from 9.6 W/m.																																				
Can the multi switch box, the multi driver box and the 3-way distributor with switching function be connected in series multiple times?	No, because the signals can no longer be transmitted properly.																																				
Can 12 V and 350 mA lights or 12 V and 24 V lights be used together?	Yes, please use our respective converter. (converters see chapter Supplying)																																				
How can sensor switch malfunctions be avoided (Ø 12 mm)?	Check for correct switch installation. The TOP lettering on the switch must point upwards in the installation situation.																																				
How is consistent bulb light colour guaranteed?	Häfele makes high demands on the selection of the materials. All Loox5 strip lights contain high-quality and long-lasting LEDs from Samsung and Lumileds. Setting very tight quality specifications ensures not only luminous flux and breakdown voltage, but also consistent light colour for follow-up purchases.																																				
What is the maximum wattage that I can connect to a device output of the driver?	With 12 V systems it is 12 V x 5.0 A = 60 W with a 60 W driver With 24 V systems it is 12 V x 3.75 A = 90 W with a 90 W driver																																				
How long may the lead between the driver and the device be?	The maximum lead length from the Loox5 driver to the device is 10 m. Long cable lengths in combination with large loads (strip light lengths) can result in voltage losses in the cable. These lead to visible loss of brightness in the lights. The illuminance listed with the lights has been determined with the rated output voltage of the driver. (12 V or 24 V).																																				
What is AWG?	AWG stands for American Wire Gauge. It is the coding for wire diameters in electrical leads that are mainly used in North America. This identifies the cross-section of wires in electrical leads that consist of strands and wire.																																				
What is the current carrying capacity of my cable?	<div>Häfele allows the following current carrying capacity and wattage:</div> <table><tr><th>Type of cable</th><th colspan="2">24 AWG</th><th colspan="2">22 AWG</th><th colspan="2">20 AWG</th><th colspan="2">18 AWG</th></tr><tr><td>Current carrying capacity</td><td colspan="2">1.5 A</td><td colspan="2">2.5 A</td><td colspan="2">3.5 A</td><td colspan="2">5.0 A</td></tr><tr><td>Voltage</td><td>12 V</td><td>24 V</td><td>12 V</td><td>24 V</td><td>12 V</td><td>24 V</td><td>12 V</td><td>24 V</td></tr><tr><td>Wattage</td><td>18 W</td><td>36 W</td><td>30 W</td><td>60 W</td><td>42 W</td><td>84 W</td><td>60 W</td><td>110 W</td></tr></table> <div>The type of cable is imprinted on the coating of the cable.</div>	Type of cable	24 AWG		22 AWG		20 AWG		18 AWG		Current carrying capacity	1.5 A		2.5 A		3.5 A		5.0 A		Voltage	12 V	24 V	12 V	24 V	12 V	24 V	12 V	24 V	Wattage	18 W	36 W	30 W	60 W	42 W	84 W	60 W	110 W
Type of cable	24 AWG		22 AWG		20 AWG		18 AWG																														
Current carrying capacity	1.5 A		2.5 A		3.5 A		5.0 A																														
Voltage	12 V	24 V	12 V	24 V	12 V	24 V	12 V	24 V																													
Wattage	18 W	36 W	30 W	60 W	42 W	84 W	60 W	110 W																													
Can an LED flexible strip light be used behind acrylic glass?	Yes, however the acrylic glass increases the colour variations (binning) up to four times and minimal colour deviations are therefore more visible.																																				
Can Loox lights be operated using multiple switches?	Yes, please use the multi switch box to do this. Up to three switches can be connected to the multi switch box (multi switch box see page 114).																																				
Why do the lights have to be plugged in first before connecting the high voltage mains plug?	If the driver is connected to the mains first, electrical power is output at the secondary side, which leads to overvoltage and therefore damage to the lights if they are connected.																																				
Can Loox lights be used in RVs/boats/cars?	Yes, for sure. We have special IC strip lights that compensate for voltage fluctuations of the vehicles without problems. Our regular LED strip lights can be used as well. It is important to note, however, that the voltage peaks may reduce the life time.
