

# HÄFELE

## THE NEW SHELF SUPPORT GENERATION.

HOLDS ANY SHELF. SECURELY.

ENGINEERED  
BY HÄFELE

# STRONG ARGUMENTS FOR STRONG FURNITURE.

1. IMPROVED SAFETY.

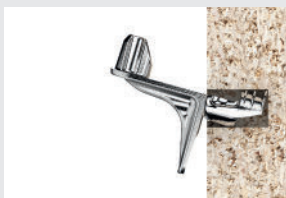

2. BETTER QUALITY.

3. MORE UP TO DATE FURNITURE DESIGN.

## 1. IMPROVED SAFETY.

A SHELF SUPPORT MUST BE SECURE.  
TOOTHING FOR 5 MM DRILL HOLES.

The new shelf support generation with the patented tothing only allows the shelf to lower by a tiny amount, and also prevents the support from being unintentionally pulled out, even under heavy load.

1) Insert shelf support at a slight angle

2) Fit shelf

3) The weight of the shelf makes the arm lie flush against the side panel

4) The twin grooves drill themselves into the wood. Greater stability is achieved

## 2. BETTER QUALITY "MADE IN GERMANY".

Tests are needed at the highest level so that we can guarantee quality over the long term.

Our shelf supports have been tested in accordance with and fulfil the new European standards **DIN 68874-1** and **DIN EN 16337**.

## 3. MORE UP TO DATE FURNITURE DESIGN THE NEW SHELF SUPPORTS FOR 3 MM DRILL HOLES.

The desire for improved design and additional aesthetics is growing in kitchen and living room furniture. Our filigree shelf supports only need extremely small 3 mm holes, without loss of load-bearing capacity or stability.

The inconspicuous rows of holes blend extremely well into the design of your furniture and are the perfect solution, particularly for surfaces that are light or illuminated, and also in combination with glass.
